EDUCATION

M.S., Data Science	December 2027
Colorado School of Mines, Golden, CO	4.0 GPA
Business Analytics Concentration	
Relevant coursework: Machine Learning, Key Statistical Learning Methods	
B.S., Computer Science	December 2026
Colorado School of Mines, Golden, CO	3.95 GPA
Data Science Concentration	
Relevant coursework: Advanced Data Science, Statistical Modeling, Software Engineering, Algorithms, Data Structures, Database Management, Coding with AI Agents	

PROFESSIONAL EXPERIENCE

Spectrum, Greenwood Village, CO: Data Science Intern	May 2026 - July 2026
- Utilized log-scale feature engineering and a Gaussian Mixture Model in performing anomaly detection on internet usage data for over 27 million internet customers (Scikit-Learn, Python, SQL, Athena, S3) - Clustered 180k+ anomalous users into behavioral clusters based on categorical usage share and protocol-level relative indexing (Scikit-Learn, Python, SQL, Athena, S3) - Predicted upstream capacity for telecom infrastructure using time-series analysis and harmonic regression, bucketing infrastructure by anomalous user density and DOCSIS split (Scikit-Learn, Python, NumPy, SQL)	
Colorado School of Mines, Golden, CO: Head Data Science Teaching Assistant	August 2026 – present
- Supported 200+ students across three cross-listed courses through weekly office hours, resolving Python and ML workflow issues and improving assignment completion and exam readiness - Guided approximately 60 students through end-to-end data science pipelines utilizing Python DS/ML libraries, providing structured and actionable feedback on unit-level projects and activities - Created a grading and assignment tracker for 3 TAs to synchronize grading progress and organize workflows (Excel) - Influenced course instruction by surfacing recurring student challenges to faculty, improving coverage of core data science concepts	
Lockheed Martin Space, Colorado Springs, CO: Software Engineer Intern	May 2025 – December 2025
- Enhanced an internal object-relational mapping microservice by implementing transaction and rollback functionality and addressing developer needs, improving bulk operation efficiency by 65% and cutting setup time for new projects (C#, .NET, SQL, LINQ) - Designed a scalable documentation workflow converting proprietary-format files into easily modifiable documents with version control support, saving developers weeks of documentation outsourcing (C#, HTML, CSS) - Adhered to military and proprietary coding standards and improved intern documentation (Git)	

TECHNICAL SKILLS

Data Analysis and Statistics: Python, SQL (PostgreSQL, SQL Server), R, Scikit-Learn, Tensorflow, Pandas, NumPy, Matplotlib, S3, Athena, Redshift, Trino

Programming: Java, C#, C++, .NET, FastAPI, Bash, HTML, CSS, Javascript, Lambda, Docker, Linq

Workflows and AI Tools: Git, GitLab, Jira, Kiro, Claude Code

ACTIVITIES

Mines Men's Varsity Swimming	Aug 2023 – present
Devoted NCAA Division 2 student-athlete and team captain at Colorado School of Mines	
Coordinated team events, led team morale, and balanced academic workload with athletic rigor as a junior and senior year team captain
